NO Pantry Moth Traps

Non-toxic traps to attract and trap pantry moths. Monitor and protect from infestation of food.

Benefits and Features

- Non-toxic pantry moth traps – 2 pack
- Safe to use where food is stored and handled
- Pheromone in glue attracts pantry moths
- Gives early warning of moths
- Helps prevent infestation and wastage of stored foods

Controls

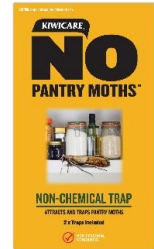

- Pantry Moths

Directions

1. Write the date on the trap.
2. Unfold the trap and peel off the protective paper.
3. Fold the trap into a triangle so that the sticky part is on the inside. Slot the tab through the hole on the opposite side so that the tab locks the sides together.
4. Place the trap on a shelf close to the food to be protected.
5. One trap is enough for a single pantry.
6. Check the trap for moths every 2-3 days for signs of infestation.
7. Replace the trap after 8-12 weeks use.

For Best Results

- When moths are detected, remove and check all dried foods; dispose of any affected.
- Vacuum and clean the pantry and any other food storage areas.
- Replace food in sealed containers.
- For indoor use only.
- See the [short video](#) on [Kiwicare.co.nz](http://www.kiwicare.co.nz) for more information on Pantry Moth control.

Active Ingredients

Non-toxic trap with pheromone; attractive to pantry moths (*Plodia interpunctella*, *Carda cautella* and *Carda figulifella*).

Registration
