Directions

Concentrate:

- Shake well.
- Mix 10 ml per 1 L of clean water.
- Hold sprayer 30-40 cm from the area to be treated.
- Dilute only what is required . Use entire contents of diluted mix within 48 hours.
- Using sprayer to apply to areas where spiders are commonly found:
- Outdoor: spray spouting, gutters, window frames, doors, under eaves, and ventilators.
- Indoors: spray around window frames, doors, floors, tops of walls and other areas where spiders have been found.

Ready to Use

- Shake well before use.
- Using pinch and twist motion, adjust spray nozzle to SPRAY position.
- Hold applicator 30-40 cm from the area to be treated.
- Turn nozzle to STOP/OFF position after use.
- Using sprayer to apply to areas where spiders are commonly found:
 - Outdoor:** spray spouting, gutters, window frames, doors, under eaves, and ventilators.
 - Indoors:** spray around window frames, doors, floors, tops of walls and other areas where spiders have been found.

Use as Part of the Kiwicare 1-2-3 Spider Control Programme

1. **Spray** – NO Spiders Total Solution should be sprayed in a targeted way on surfaces in areas where spiders, webs and egg sacks will be; e.g. indoor and outdoor places such as ceilings, gutters, eaves, downpipes, fences, washing lines and decks. It can also be used on vehicle undersides, wheels, wing mirrors, etc. Note: Do not remove webbing; apply to spider webbing and leave for 2-3 days before brushing down webbing. NO Spiders Total Protection controls all stages of the spider life cycle; eggs and adults. NO Spiders Total Protection remains effective on surfaces for up to 6 months giving long term protection to you and your family. NO Spiders Total Protection can be used indoors and outdoors.
2. **Fumigate/Bomb** – After spraying with NO Spiders Total Protection use NO Bugs Super Bug Bombs to quickly knock down spider numbers and treat areas that may not have been sprayed. NO Bugs Super Bug Bombs contain the same active ingredients as NO Spiders Total Protection and will enhance the effectiveness of the targeted spray treatment. NO Bugs Super Bug Bombs are an ideal way to treat roof voids and other voids where spiders including white tails spiders may be nesting.
3. **Clean** – After treatment, vacuum thoroughly to remove eggs, dead spiders and webbing. Brush down webbing with a dry brush. On exteriors SORTED Dirt & Grime can be used to assist in the removal of unsightly webbing. If using SORTED Dirt & Grime reapply NO Spiders Total Protection spray afterwards for long term control.
