Weed Weapon Natural Power Concentrate

Fast & effective natural control of weeds.

- 20 L (Makes up to 285 L)
- 200 L (Makes up to 2,850 L)
- 1,000 L (Makes up to 14,285 L)

Developed and tested for commercial and professional use in New Zealand conditions.

Proudly New Zealand made.

CONTAINS: 650 g/L Fatty acids (plant derived) and soaps in the form of an emulsifiable concentrate.

HSNO Approval Code: HSR101254

HSNO Classifications: 3.1C, 6.3A, 6.4A, 6.5B, 9.1B

Registered pursuant to the ACVM Act 1997, No. P9599.

See www.foodsafety.govt.nz for registration conditions

Read the label and SDS completely before mixing or applying.

Kiwicare Corporation Limited, 225 Maces Road, Christchurch 8643, New Zealand. Ph: 64 3 389 0778

READ LABEL BEFORE USE

- Weed Weapon Natural Power works by disrupting the waxy cuticle and cell walls of weed foliage causing rapid uncontrolled water loss, wilting and desiccation.
- Mode of action requires complete coverage of all weeds to ensure that good control is achieved.
- Weed Weapon Natural Power is non-systemic and is rapidly broken down in the soil.
- Fast acting, visible results will happen within hours.
- BioGro Certified Input

DIRECTIONS

For targeted application on weeds only.

This product is approved for the purposes of spraying weeds along fence-lines, paths, driveways, adjacent to buildings and yards on any BioGro certified property. The product may be used for spraying out an area prior to planting.

Spraying weeds under or around fruit trees, grape vines or berry canes on BioGro certified properties is also permitted.

The applicator must take all practical steps to avoid spray drift on to the crop - we recommend the use of a knapsack sprayer or mini-boom. The product can be used on the fringes of weed mats that sit directly under fruit or vegetable bearing plants, trees or vines. This is to manage weed ingress towards the crops over the weed mat itself. Please note this product is not approved for use directly on crops.

Annual weeds and newly emerged perennial weeds:

Dilute 70 ml Weed Weapon Natural Power per 1 L of water (or 7 L per 100 L of water).

Mature and tougher weeds:

Dilute 100 ml Weed Weapon Natural Power per 1 L of water (or 10 L per 100 L of water).

Application Methods

Knapsack and Gun application: Use conventional application equipment capable of achieving complete coverage of target plants. Use sufficient pressure to penetrate the weed mass so that spray reaches substrate below.

Boom spraying: Apply Weed Weapon Natural Power at rate of 70 - 100 L/ha (using a dilution of 10 L of concentrate per 100 L of water, i.e. 500 - 1000 L water/ha) with course fan nozzles. Boom height should be set so a double overlap of nozzle pattern is achieved at the top of the target plants. Ensure that the coverage penetrates through the canopy of the plant.

For Best Results

- Apply in dry conditions when rain is not expected for 2 hours.
- Complete coverage is required for effective control.
- Best results are achieved on warm dry days and on young weeds.
- For difficult weeds repeat at 3 - 5 days.
- Do not apply to desirable plants or turf as this is a non-selective herbicide.
- If desirable plants are sprayed, immediately hose off with water to minimise harm.
- If using near coloured paving stones or gravel test a sample area before application.
- Avoid spraying aluminium or rubber.
- Apply to weeds <10 cm high.
- Do not apply in temperatures below 3°C.
- Can be used with a spray marker dye.

Warning: Flammable liquid and vapour. May cause skin irritation and sensitisation; may cause eye irritation.

Precautions: This product must be under the control of an approved or certified handler during use if used in a wide and dispersive manner. Avoid skin contact and inhalation. Wash hands and exposed skin after use. When applying wear eye protection and waterproof gloves. Take off contaminated clothing and wash before re-use.

First Aid: If swallowed rinse mouth. IF ON SKIN (or hair) remove contaminated clothing wash skin with soap and water. IF IN EYES rinse cautiously with water for several minutes. Remove contact lenses if present and safe to do so, continue rinsing. If skin or eye irritation persists or if you are unwell seek medical advice or call the Poison Centre (0800 764 766). Have product container or label to hand.

Environmental Care: Collect spillage. Do not apply into or onto water. For ground-based applications only.

Storage/Disposal: Store in a cool dark place (below 35°C) out of reach of children and away from direct heat, naked flame and sunlight. Dispose of product by using it in accordance with the label. Dispose of container after triple rinsing and adding the wash to the spray mix. Do not burn.

As Kiwicare Corporation Limited has no control over the storage or use of this product, no liability is accepted for accidents or damage arising from the incorrect storage or use of this product.
