

KIWICARE®

LawnPro Lawn Thickener Feed and Seed

The fast easy way to a thick lush green lawn

www.kiwicare.co.nz

Background

[LawnPro Lawn Thickeners](#) is an innovative product for easy application of seed and nutrients to lawns. The Even-Flo™ spreader device makes even application of granules as easy as walking on the lawn. The unique ball design spreader creates a perfect, even spread of granules across the lawn, giving great results every time.

New Product

Benefits and Features

- Easy to apply – ergonomic handle design, flip open spout, walk over lawn and let the spreader evenly apply the granules.
- Blend of fescue, ryegrass and browntop seeds with special coating to improve water retention and germination.
- Seeds are coated with wetting agent, fungicide and bird deterrent.
- Covers up to 100 m²
- NPK 6 : 2.5 : 3.7
- Combination of immediately available nutrients and slow release to give strong germination and growth.
- Gypsum to improve soil condition and drainage.
- Humic acids and organic ingredients improve soil structure and microbial balance.

Available As

- 2.8 kg pack with spreader, 2.8 kg refill

Active Ingredients

Lawn Seed*: Fescue, Ryegrass and Browntop.

Fertilizer and media: Gypsum, Humic acids, NPK - 6 : 2.5 : 3.7

Application

Apply at a rate of 28 g/m², i.e. 2.8 kg covers 100 m²

Directions

1. Up-turn the container 2-3 times before opening and use.
2. Un-clip spreader top and remove seal. Replace spreader top.
3. Holding the spreader by the handle, flip open the spout.
4. Holding by your side, tilt the spreader until granules start to flow.
5. Walk at a slow and steady pace up and down the lawn. Walk approx. 10 m in 15 seconds. Do not shake the spreader side to side.
6. Water in with 1 hour gentle sprinkler or moderate to heavy rain (approximately 5 mm).
7. Avoid mowing for at least 14 days.

For Best Results

- Apply in Spring and Autumn; but can be applied year round.
- Remove thatch from lawn before application.
- Rake lightly after application to get seed to the soil level.

Caution

- Cause skin and eye irritation.
- Avoid contact with skin and eyes.
- Do not contaminate waterways.

What's in Lawn Thickener?

*About the grasses:

Red fescue (*Festuca rubra*) is a fine-bladed grass with a deep green colour. It does not require much fertiliser and is tolerant of drought.

Perennial ryegrass (*Lolium perenne*) is a fine-textured, rich green grass. It has a high tolerance for cold temperatures.

Browntop (*Agrotis capillaris*) is a fine-textured, bluish green grass. It is tolerant of low fertility soils and has a low growth habit requiring less mowing.
