# NO Cockroaches Fumigator

## Benefits and Features

- Releases a fine vapour to kill cockroaches where they hide.
- 20g fumigator covers up to 50 m<sup>3</sup>.
- Quick knock down and easy to use.
- Excellent for use in hard to reach places.
- Dry clean up and does not stain.

## Controls

- |                                 |                                 |                                     |
|---------------------------------|---------------------------------|-------------------------------------|
| • <a href="#">Cockroaches</a>   | • <a href="#">Booklice</a>      | • <a href="#">Clothes Moth</a>      |
| • <a href="#">Ants</a>          | • <a href="#">Weevils</a>       | • <a href="#">Pantry Moth</a>       |
| • <a href="#">Borer</a>         | • <a href="#">Grubs/Larvae</a>  | • <a href="#">Wasps</a>             |
| • <a href="#">Carpet Beetle</a> | • <a href="#">House Flies</a>   | • <a href="#">Whitetail Spiders</a> |
| • <a href="#">Silverfish</a>    | • <a href="#">Cluster Flies</a> | • <a href="#">Spiders</a>           |

## Directions

**Coverage** - Work out how many NO Bugs Super Fumigators are required as follows:

- Multiply floor area of each room - e.g. 3m x 6m = 18 m<sup>2</sup>
  - Multiply floor area by height of room - e.g. 18m<sup>2</sup> x 2.6m = 46.8 m<sup>3</sup>
  - Do the above calculations for each room.
  - Add up each room and total, divide total by 50 to show how many NO Cockroach fumigators are needed for the whole area to be treated.
  - Always round up, e.g. if the total is 160 m<sup>3</sup> (160 divided by 50 = 3.2) you should use 4 NO Cockroach fumigators, not 3.
1. Close all exterior windows and doors. For voids, such as sub-floors and roof voids restrict ventilation by sealing air vents.
  2. Remove any pets, plants or food from all areas to be fumigated. Fish tanks should be covered and turned off.
  3. Turn off or remove all smoke alarms. Turn off air circulation systems.
  4. Remove the lid from the top of the plastic container and dispose of the cardboard disc.
  5. Place plastic container in a central position on a firm heat proof base e.g. Brick or tin lid.
  6. Pour water up to the dotted line on the plastic container. Do not fill above the dotted line.
  7. Open the foil package and remove fumigator can.
  8. With the red side facing upwards. Place the fumigator into the water in the plastic
  9. container.
  10. Replace plastic ring cap on container. Fumigator will start in 1-2 minutes after placing in water.
  11. Leave fumigator area closing external doors and windows.
  12. Do not return inside for at least 3 hours. Before reoccupying rooms, open doors and
  13. windows to allow the treated area to air for 30 minutes
  14. Vacuum room thoroughly and wipe down food preparation surfaces.

15.

## For Best Results

Use in conjunction with:

- [NO Cockroach Traps](#) for use in kitchens and larders and monitoring for new infestations.
- [NO Cockroaches Nest Killer Gel Bait](#) for ongoing control of adult and nymphs.
- [NO Cockroaches Nest Killer Spray](#) for long term residual control where cockroaches live and hide.

## Active Ingredients

72 g/kg Cyphenothrin in the form of a vapour

## Registration

HSNO Approval Code: HSR000268.

## Available As

- 20 g water activated fumigators.

## Complementary Products

- [NO Cockroaches Nest Killer Spray](#)
- [NO Cockroach Traps](#)
- [NO Cockroaches Nest Killer Gel Bait](#)
