# SORTED Dirt & Grime

## Benefits

- Easy to use, simply spray on and rinse off
- Safe around kids and pets. Non-toxic and biodegradable
- Removes dirt, grime and salt water
- Safely cleans most outdoor surfaces
- Covers up to 275 m<sup>2</sup>

**Formulation:** A mixture of different surfactants plus Chelate agents

## What's the difference?

SORTED Dirt & Grime gently lifts and loosens dirt and grime on outdoor surfaces such as weatherboards, downpipes, gutters, windows, doors, vehicles, fences, and much more.

We have matched the best hose end for the type of application. This hose end will provide a wide even distribution, making it quicker to apply and rinse off, giving the best results. It has an ON, OFF and WATER only switch.

## How do you use it?

1. Connect the garden hose.
2. Turn the spray head to 'WATER' and turn the tap on until stream travels about 4m, then turn the spray head to 'OFF'.
3. Pointing the hose at the surface to be cleaned turn the Hose End to 'ON'.
4. In a sweeping motion cover the area to be cleaned with the solution.
5. Leave for 2-3 mins. **Do not allow to dry.**
6. Turn the spray head to 'WATER' and thoroughly rinse off.

## Where not to use it.

This formula is safe to use in all outdoor situations.

## FAQ

*Why shouldn't I let the foam dry?*

SORTED Dirt & Grime lifts dirt and grime from the surface and holds it in the water so that it can be rinsed off. If the Dirt & Grime dries the dirt will adhere to the surface again.

*I have a tank water collection system; can I use SORTED Dirt & Grime on my roof?*

Yes. However you will need to disconnect the water supply from your tank until you have had at least 5 mm of rain, this is enough to make sure any surface residue has gone.

*Could I use SORTED Dirt & Grime as a concentrate and how do I do this?*

Yes, SORTED Dirt & Grime can be used as a concentrate. Mix 20 ml of SORTED Dirt & Grime for every 1L of water. Apply with a brush, leave on for 2-3 mins and hose off.
